

## Testimonial

"I felt that \$52,000 was a good price for a highway tractor I wanted to sell but a prospective buyer offered me \$32,000 over the phone. After showing him the Service Detail report from the system detailing all the service work we did to the truck I got the \$52,000 I wanted."

Andy W

"I was thrilled to discover your database. It appears to be as complete as anything going. It is also much more user-friendly than other Access databases that I've seen. I appreciate your efforts and look forward to sharing the application with our mechanic."

Gary L, Director of Attendance & Transportation

A Tennessee City School System

In use by organizations ranging from large farms to oil patch to heavy construction.

## System requirements

- Windows XP, Windows Vista or Windows 2003 Server or newer
- Screen resolution 1024 x 768 or larger
- 80 megabytes disk space
- Network/server ready

## Coming soon

- Check lists
- Parts Inventory
- Fuel mileage

## Additional information

For more information, including screen shots, or to download a demo system visit [www.granitefleet.com](http://www.granitefleet.com). Or contact us anytime.

## Benefits

- Comprehensive maintenance records can increase resale value.

- Show you did the maintenance to your leasing company or next owner

- Mobile asset tracking. What job or location is your equipment assigned to?
- Preventative maintenance scheduling avoids costly downtime of equipment and crews
- Traceability for liability purposes
- Fleet inventory and valuation
- Inspection alerts
- Help decide when maintenance costs are getting high and it's time to sell or otherwise retire a unit
- Can be customized to meet your business requirements

## Tip

Consider tracking fire extinguishers, self contained breathing apparatus and other small equipment requiring annual inspections.

## Features

- Maintenance history
- Service schedule
- External invoices
- View digital photographs or scanned documents by unit or service order
- Parts history
- Parts by unit

- Reminders when inspections are due or equipment is overdue to be returned
- Track equipment maintenance costs
- Scheduled inspections
- Customer invoicing with markup %s
- Customer equipment reporting
- Email reports and files from within the system
- Backups can be emailed
- Extensive, customizable reporting
- Extensive searching and inquiry

## Pricing

\$50 for each of the first 10 active units. (A unit is a piece of equipment which needs periodic servicing such as trucks, trailers, bulldozers, generators, air compressors or lighting plants. Fire extinguishers, SCBA or similar are not part of the licensed unit count.)

\$5 for each of the next 100 units

\$2 per unit thereafter.

Thus 125 units would be  $10 \times \$50 + (100 \times \$5) + (15 \times \$2) = \$1030$ .

The supplied license key will have 10% additional units to allow for growth.

Annual updates are 25% of the current pricing for the number of licensed units.

Free initial import of equipment spreadsheet data.

## Support

Unlimited telephone or email support for the first year or while purchasing annual updates. But you'll seldom call. Really!

## Installation and Training

Available at \$95 per hour and travel. However the system is easy to install. The users themselves state the system is easy to use. Online help is available throughout the system.
